Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Architect, Engineer, and Operative Builder s Constructive Manual In consequence of the vigorous condition of engineering practice, the author considered that a correct analysis of those mineral substances which comprise the greatest portion of building materials would add materially to the practical value of the work. For this purpose, he has made a collection of British specimens, and has subjected them to minute chemical analysis. The result of these examinations will be given in the forthcoming part; and it is hoped that the information thus laid before the profession will prove to be of considerable importance. The second part will contain chapters on the following subjects: - 1. On the sands of the plastic clay formation. 2. On the analysis of the principal mineral substances employed in building. 3. On concrete, asphaltic, and other cements. 4. The construction of foundations on various soils. 5. On the machines and scaffolding used in excavating and building. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
